Faridabad,

Dhaka-1204

Dear Tarif,

Hope you are well by the grace of Almighty.
In your last letter, you wanted to know about
my future plan after passing H.S.C. Now, I describe
about it. You know H.S.C is the most prominent
exam in our country. So in our country, after
H.S.C all students take Public University
admission preparation. My dream is after passing
hsc exam I will take hardest preparation
for my University admission. You know that
from my childhood, I want to be a
engineer and admitted into a Dhaka University.
So, that's time is the most important
momentum to fulfill my dream.

3

I cannot stay in day dreaming. Instead. I
want to give my best for my own dream.
No more today. Take care yourself and your
family.

Yours ever
Mahin

The pie chart illustrates the sources of USA electricity in 1980.

According to the chart, we can see that in 1980 most percentage of electricity in USA comes from burning coal, which rate was 46%, nearly half of the chart. Natural gas consumption gives second highest source for produce electricity, which is 24%. Moreover, hydro electric power plant produce 16% percent electricity in USA. Oil and Nuclear power plants also a important sector to supply electricity, which rate is

respectively 72% and 2%

From the chart, we explore that coal is the most powerful sector in USA electricity supply. Natural gas and Hydro-electric power also play a huge role.

"The Lion and the Mouse"

Once a lion was sleeping in a forest. Suddenly a mouse came there. It was in fact, playing on a race quite happily and didn't notice the sleeping lion. While running into his body, he entered the lion nose, and this time the lion woke up. With his roaring, he told him "How dare you a tiny creature." You don't know me. Why you disturbed me. Now I will kill you." The mouse reply the faint voice that "don't kill me! Lord; I cannot see you. I only play outside you."

12

I am a tiny creature, if you killed me that's not fame for you." The lion reply that "you disturb me in my sleep. as a tiny creature. you cannot give me proper respect." The mouse reply that

"My Lord, please forgive me. One day I will help you." The lion laughed and told that

"You, a tiny creature helped me. Now, I forgive you, but at the next time be careful about myself, so away." The mouse thanked him and go far away.

After passing some days, the mouse searching for food in the forest, suddenly, he

hear something. Then the mouse
clearly hear that "A lion was roaring"

Then, he go to the place and see
some unpredictable. The mouse saw the
lion and remember the lion who forgive
him ^{captured in a net}. The mouse told faint voice "Friend!

Don't be afraid, I will help you. as that

he go to the net and cut the net

with his sharp teeth. Then the lion

be free. The lion told that "Thank you

my friend for saving my life from today

we are one friend"

'Artificial Intelligence'

Artificial Intelligence is called 'AI' which means one acts like a human brain. When we ask any question it gives us correctly answer. It works like human brain and recovery their wrong answer. Nowadays, AI have many features. Like answer and question, deep learning, Nano banana instant video maker, analysis, create islong, photoshop tool etc. For instant moment, we take knowledge from AI. If we want to write new thoughts it's helps us to know about the world.

Around the world, every country, nation use AI in their daily activities. From morning to night we use it. when set into a special moment and it remind me in time. Moreover, Nowadays government use it in Data traffic system and we can take the advantage and our traffic control system must be better than past. In the world, we see that.

'Albenia' declared first AI health minister and it is the first in world where worked as a minister. Moreover we use it different sector. AI has create a revolutionized teaching and learning. we can ask

any question in AI and get the reply in a moment. It's also work a research analyst. They can know all things with AI. It's work like a library. where we can get the ~~all~~ knowledge. we find that one day 'AI' work in factory, mills and all sector. It also hampers our human activity with work AI we cannot stay in deep thinking.
