Artificial Intelligence

AI means Artificial Intelligence. Artificial Intelligence is a technology

Artificial Intelligence

Artificial Intelligence is a man made technology with which some chosen techs can think like humans and take decisions. AI is the short form of Artificial Intelligence. With the help of AI the world has never been the same as before. AI's like ChatGPT, Gemini, Deepseek, Grok etc help us to solve complex problems with ease, they help us generating images for from our own imagination. It helps us to know something which we don't know. It

can give answers to any of our questions.

Different AI's will have different features like

with Chatgpt you can do everything easily

while with Gemini you can generate some

good quality pictures. ~~with~~ While there are

some AI's which are good at solving maths

and etc. ~~AI~~ ~~is~~ ~~turning~~ our life to

easy mode with AI we can even get

help for our education. AI have limitless

information about everything. We can use

AI to get help with anything we wanna

know. The teaching sector has been improved

by adding AI. Some of the teachers

now uses AI to mark their students

exam sheets while they personally take

care of their students. For learning AI

is more good. Suddenly wanna learn another

language? Or wanna learn chess? AI can help you with that easily because of how much knowledge about everything it has. AI is quite useful but it has its own disadvantages too. We can say that with the help of AI we are getting lazy. We are using AI to generate our assignments using AI to cheat on exams and even generating fake explicit images of others to blackmail them and rob them for money. With some of the AIs we can even learn how to hack and become a hacker who hacks accounts of other people just for their own fun. AI has many important uses and even misuses so, in the conclusion we can say that AI is important until we use them to some certain actions which

doesn't harm others.

The following Pie-chart shows the sources of the USA electricity in 1980.

In the chart the use of nuclear plants were the lowest with just 2%. So 2% of ~~electrall~~ electricity of the USA was made from nuclear plants. Right next up is ~~oil~~ oil which makes 12% of the electricity with a staggering 10% rise from nuclear plants. Hydro-electric power is the ~~third last~~ source of electricity. With this one alone, USA made 16% of their electricity. Now comes the big ones. The second largest one is ~~natural~~ gas with 24% and the most used method was

coal. 46% of the electricity was made from coal.

So, we can now say in 1980, USA

used coal for 46%, natural gas for 24%,

~~oil for 12%~~ hydro - electric power for 16%,

using oil to make 12% and using nuclear

power plant for the remaining 2%

The Lion and the Mouse

Once a lion was sleeping in a forest.

suddenly a mouse came there. It was, in

fact, playing on a nose quite happily

and didn't notice the sleeping lion. While

running it accidentally bumps onto the lion which leads to the lion waking up. After seeing the mouse the lion roars roars with the irritation and rage and the ^{told} asked the mouse "Give me a reason to not kill and eat you". Terrified the mouse starts to shake while looking at the lion and says, "Please spare my life. Who knows when I might come handy to you?". After hearing what the mouse said he bursts out laughing while mocking the mouse, "What can a pathetic little mouse even help me with?" the lion says to the mouse while laughing and let the mouse of

the hook. The mouse runs away after the lion releases him. Somedays later while the mouse was running here and there it happens to hear the lion's roar from a distance and decides to go and look. After some time the mouse sees the lion inside a netting. It was a trap set by the hunters. After seeing this the mouse doesn't hesitate even for a bit and rushes to help. It uses its sharp teeth to eat the net and releases the lion. The lion gets completely dumbfounded and then thanked the mouse. That's how the mouse helped the king of ~~the~~ jungle the lion and they become best friends.

A letter to my friend describing the future plan after ~~ex~~ passing HSC exam

27th June, 2026

Azimpur, Dhaka

Dear Siyom,

Hope you're doing well by the grace of Allah.

Yeah I'm doing well to. Remember our last conversation at your home? You asked me about my plans after HSC. I didn't have one that day but now I have one. In this ~~last~~ letter I'll write about it.

For now passing and getting a great result in HSC is the main target of mine and after I pass I want to go abroad for studies. I like engin engineering so, I was thinking about

moving to Russia after my HSC and
continue my study there and get a degree.
I don't have any plans right now about
what I'll do after that tho.

No more today my friend. Convey my
salam to your parents and some love for
your younger siblings.

your best friend

Ritom
