Pasteur was a French scientist. Pasteur

At first, he treated only animals because he did not want to cause death of human being. One day, a boy named Joseph Meister was brought to him. He had been bitten by a mad dog. The dog was cured. He noticed that many diseases are caused by germs and he also found cures for several of them. He found a mad dog and injected some weak germs of its disease into its blood. Pasteur gave him some injections and the boy did not get the dog's disease. The news of Pasteur's success spread all over the world. Other doctors began to study his work.

"Artificial Intelligence"

Artificial intelligence is the short form of AI. AI is the a meaning which is built up by using human intelligence. That's mean AI is the outcome of human intelligence. This world is becoming AI dependent. We can't think anything without using a AI. AI is very important for present world. By developing a country, we must use AI. Human being can many dangerous work by using AI. We can find any question's answer with a few second by using AI. Even we can do many ~~for~~

dangerous work by using AI. In education system, AI is very important. Students get many benefits by using AI. They can find any problems solution within a few seconds. They can take help by making their assignment. They can increase their general knowledge by using AI. We can see that AI is very important for student. Not only student but many scientists use AI by solving difficult cases. Even doctors do difficult operations by using AI. Teachers also use AI by giving better education to the student. We can say, AI makes our life easier. We can do many things

by using AI. But there are some bad sides in using AI. If students always use AI, they are become over dependes on AI. They can't solve any problems without AI. even they can't do their assignment by their ownself. AI can't replace the place of teacher. ~~A teacher can teach~~ Their are large difference between a human teacher and AI teacher. we can find emotion when there is a human teacher. ~~but~~ we can't find any emotion in AI teacher. So, we can say human teachers are very important than AI teacher and students are also can learn better in human teacher not AI teacher. By using AI

bad in huge amount, ~~with~~ we will become

phone addicted. Sometime AI gives

us wrong information which is so much

harmful for doctors, scientists. Besides, there

are many people who use AI by wrong

ways. Those people want to try destroy

this world by AI. AI is very important

for present world and for human.

Human can get ~~definite~~ benefits by using AI

in right way but if ~~they~~ use AI

in wrong way, AI become harmful. So,

Every one must be careful about using AI.

The chart shows that the sources of the USA electricity in 1980.

In 1980, coal was largely used in USA electricity. The per cent it was used 46% and it is the highest amount. Natural gas ^{was} also used largely in USA electricity. It was used 24%. Hydroelectric power used 16%, oil used 12%, Nuclear used 2%.

There we can see that coal ~~are~~ was use largely than natural gas. We know if we ~~beann~~ coal it reduce carbon dioxide which is harmful ~~for~~ atmosphere and it is cause of ~~Acid~~ acid rain, which is so

harmful for human, animals. Natural gas

using is quite healthy ~~to~~ rather using of
coal. 24%. Natural gas ~~are~~ was good for

atmosphere. Hydro-electric is the renewable

energy source. That's why it's good for

human being and it's not harmful for human

animal. It will never finish so this is

good source of electricity. Nuclear

is not a renewable energy source it

is unrenewable energy source. So, it's

not good for nature.
