

Ans to the Question No: 1

A

(a) (iii) being displaced lives outside the country

(b) (ii) flying objects

(c) (iii) blockade

(d) (i) rushed in large number

(e) (i) coward

B

(a) Because of the harsh and rough situation in Gaza, the writer can't write beautiful words. The crying people, poverty, fear of war, sickness of people are the reasons why the writer can't write

beautiful words about Gaza.

(b) The author became aware of the harsh and rough situation of Gaza and its people who especially the kids who are always crying in that situation even every element ^{and people} in Gaza are in crying state and it made the author sad.

(c) The author goes around the world in his imagination where he stands on the shore of sea and it is the only thing that helps him to dream and go around the world while standing in the same shore of sea.

(d) The author goes back to the tough situation of Gaza after his dreaming of travel at the shore of the sea because of the harsh situation like dirty market, overflowing sewage, unbearable smell and silent people who can't speak.

(e) The author bears flies because the weapons can fly and harm the people like missiles or drone. So, the author bears anything that flies even the flies cause flies to always fly around the air. So, thinking of it as a weapon which can fly scares him even the things just fly like flies.

Ans to the Question No: 2

Pasteur was a French scientist. He noticed that many diseases are caused by germs and he also found cures for several of them. At first, he treated only animals because he didn't want to cause death of any human being. He found a mad dog and injected some weak germs of its disease into its blood. The dog was cured. One day, a boy named Joseph Meister was brought to him. He had been bitten by a mad dog. Pasteur gave him

some injections and the boy did not get
the dog's disease. The news of Pasteur's
success spread all over the world.
Other doctors began to study his work.

The following graph shows the sources of the USA electricity in 1980. As we can see, natural gas was mostly used for electricity in that time, which was 50% of the total sources. So, natural gas is ranked first in terms of most using. Then natural gas comes second in terms of using. So, natural gas was used to get 24% electricity for USA in 1980.

Obviously, the third place goes to hydro-electric power which were used to

get 16% electricity in that time of USA.

After that, oil comes with a percentage of 12 which is ranked fourth in terms of most using source in that time.

At last but not the least, nuclear power source ranked fifth the lowest, which rate is only 2% of the whole sources.

As the world has limited power sources

like natural gas, coal or

nuclear sources like Uranium. So we

should focus more on renewable energy

sources like solar power or windmills or

creating energy with the help of water

flows.

Artificial Intelligence

Artificial Intelligence means some kind of human developed technology which tries to behave or act like a human brain and can operate with its own intelligence.

It works like a human brain that can be trained or operate in various ways however the commands or operators wants.

There are various parts of AI like machine learning, ML, Robotics, speech program etc.

AI can operate on its own developed system and can answer any questions we want to know about, It can give us any information or and also It listens to our

commands as we want to run it. It can solve many problems, give advice and most lively act as a human.

We use AI in VR virtual realities, education sector, analysing many problems and finding a solution.

AI can also help us during our diseases.

It can give us the right advice and right medicine to take. In education sector, stu-

dents can ask ^{about} whatever problem they are facing like any grammatical ques-

tions or math problems, AI can solve

it immediately and also can explain it

to the students. AI has an important role

in teaching and learning sector of today.

world. Students can learn anywhere from the earth and can solve or ask

anything they want. For this reason, the tuition market has fallen down to a lot.

In spite of having unlimited good features it also have a lot of negative sides.

Students don't study properly, they just copy and paste the ~~solutions~~ from AI.

People are becoming too much lazy and dependent on it which may lead the world in a catastrophic way.

It should be used while needed or limitedly.

We should keep ourselves away from its negative side and rely less on this thing.

Thus we can live a good life using AI.

Dear Rabi,

I hope you are doing well. In your last letter, you wanted to know about my future plan after the

well, at first, I want to do some travel around the country with my friends. Then, I want to learn computer and develop some skills about it.

I am also thinking about giving the IELTS exam a try and get a good mark because you know that

I want to go Germany to study mechanical engineering and settle there.

That's all that I had thought up until now.

well, I also want to know about your plan.

Give my best regards to your parents and

say hi to your sister for me.

Ans to the Question No: 11

The following poem indicates to seek our dreams and hopes seriously. All of the people can dream but can't make the dream into reality.

Those who take their dreams and hopes seriously and work endlessly on it are the only one who can make it reality and succeed in life.

They are the real ambitious people who just don't sleep and dream but also work on it endlessly and make it happen.

Ans to the Question No: 2

Once a lion was sleeping in a forest. Suddenly a mouse came there. It was, in fact, playing on a race quite happily and didn't notice the sleeping lion. While running the mouse fell into the lion's ^{mouth} body and there was a little prick wounded in the lion's mouth. The lion's sleep was broken and it became angry and started to bully the mouse. Then, the mouse said one day I will help you and run for its life.

Then one day, An hunter came to the forest and wanted to hunt ^{down} the lion. Then the mouse seen it and told the lion where

the trap was. The lion was safe

for the mouse and even thanked
the mouse.

moral of the story is size doesn't matter

and never bully anyone cause we can

need the little ones sometime.
