

Ans to the q. no 1 (A)

a. (iii) being displaced lives outside the country

b. (ii) flying objects

c. (iii) blockade

d. (i) rushed in a large number

e. (i) coward

Ans to the q. no 1(B)

5 a. The writer can't write beautiful words about Gaza because of the things he sees in Gaza. He sees the poverty, siege and famine, especially when the Gaza city flooded into AL-Ardeesh and emptied it from all goods in couple of hours also there is fear because of the war going on.

b. The author become aware of saying some words about Gaza.

As it is war damaged and fear of breaking out of a war always prevails around the area.

c. The author can go around the world in his dream and the sea is the only thing helps him dream. Standing at the shore he can imagine Cyprus, travel to Paris, fly to Rome, he goes all around ~~the~~ world and at the end he ~~has~~ lands on his bed in house.

d. The author goes back to the reality of Gaza after dreaming traveling around the world. Because, of the ~~reality of Gaza~~ he dream about traveling around the world and when the dream ends he go back

to the reality of Gaza.

e. The ~~an~~ author fear flies because he feels it is going to kill his older brother. The war in Gaza changed the mentality of <sup>the</sup> author he compares the flies as missiles from enemy. That is why the author is scared of flies when they sit on any of his older brother.

## "SUMMARY"

Hope is the thing which encourages us to live and enjoy our life. Hope is like a bird it can fly on it's own. It

reaches soul to soul. Hope never ends in human life. It is continuous.

It derives us and guide us from the beginning. Human life is basically running on hope

Theme:

The poem upholds the significance of dream in human life. Dream can be ment differ by two people. One imagines it sleep. Living in ones own fantasy. Other one can be have an actual meaning. One cherishes something in real life which is a dream to him. And he tries harder to make them come true.

## Ans to the q. no 8

The pie chart ~~shows~~ indicates the sources of the ~~USA~~ USA electricity in 1980. From the chart we can see that highest electricity is produced by burning coals which is 46%. And the least amount of electricity is produced by nuclear energy which is 2%.

At the beginning of the chart we can see that in 1980

USA produced its 16% electricity from Hydro-electric power. Then

2% from Nuclear power plant which is the lowest amount of power produced by this sector. Then

moving on oil power plant produces

12% of energy. As mentioned

earlier the highest amount of

energy produced by burning coal

which is 46%. Lastly by

burning natural gas USA produces

29% of its energy.

Now ~~so~~ producing energy is very

difficult because natural fuels are

not as limited which also

limits on energy producing. Now countries  
are shifting to nuclear power plant  
for producing electricity. As it  
is now more efficient than  
burning natural fuels.

Lalmatiya Residential Area, Mohammadpur

✓ Dear Azwad,

In your last letter you wanted to know about my future plan after HSC Exam. Now I am writing on

After passing HSC examination I intend to be a doctor. For this after the exam I have to take preparation

for the medical admission test to get selected at a government

medical college. The reason to become a doctor are few. In my village

there is no good hospital and

doctors. I want to establish a

hospital in my village. Where village people can get advanced medical ~~care~~ facilities at a reasonable price. So, that is why I want to be a doctor.

No more today. With best wishes

Your loving friend

Rezwan

"Small Creatures Can Be Helpful to Big ones"

2  
Once ~~there~~ a lion was sleeping in a ~~to~~  
Suddenly a mouse came there. I was  
in fact, ~~playing on a race~~ quite  
happily and didn't notice the sleep  
lion. While running, the mouse  
accidentally bumped into the nose of  
the lion. The lion woke up angrily  
and said, "How dare you wake me  
up". The mouse got scared and  
plead ~~for~~ its life. The lion  
was very angry it threatened to  
kill the mouse. Then the mouse

requested the lion to set him free. The mouse also said to the lion that it would be helpful to the lion someday. Hearing this the lion laughed out loudly and said how can be a small creature can help a big wild animal. However, the lion ~~set~~ set the mouse free.

One day the lion was walking through the ~~jungle~~ suddenly it fell on a trap set by some greedy hunter. It called for help but none came. Suddenly the mouse came to the

lion. Observing lion's condition the mouse intended to help it. The lion said how it can help him. The mouse told that it can cut the net with its teeth and set it free. So the mouse started to cut the net. After sometime it cut the net successfully and set the lion free. Then the lion understood the significance of small creatures. At last the lion and the mouse went away together into the jungle.

## Artificial Intelligence

Artificial intelligence (AI) is a tool of computer which can solve problems by thinking like human. ~~although~~

Though it is a machine but it can think rationally and logically

like human. It can learn, read, recognize things, talk like human. AI got so many features.

AI can solve any problems within a very short course of time.

It can learn new things

looking up in internet and can

inform us or provide us with information

As mentioned it can recognize voice there are some ~~not~~ AI voice assistant which can help us solving some daily problems

Voice assistant like Alexa, Gemini, Siri etc can help us by listening to our voice

There are some applications of AI.

They are, ChatGPT, Deepseek, Gemini,

etc. ~~It can make images~~ Galaxy AI

for Samsung etc. These AI application

can generate images, describe a

problem, ~~can teach~~ various things

we don't understand. It also helps

us in learning. AI can

help us in our learning. If we give AI a set of lesson to ~~summarize~~ summarize it and teach it to us, it explains the lesson to us. If we have instant learning problem AI can easily describe it to us. But I find many threatening aspect in AI. AI can cause harm in future. AI is currently replacing workers for automated works and it is developing itself day by day. If we can't control AI's power

it can cause harm to us. If AI get uncontrollable it can threaten us. It can be used to cause harm to the civilization. Also it is reducing workplace by replacing humans at work. So, it has become concerning that AI can harm us.
